### Profile

Business analyst with an MSc in Business Analytics (Commendation) and 8 years of sales, logistics and operations experience. Turns business questions into clear evidence using SQL, Python, Power BI and requirements and process analysis. Portfolio projects cover healthcare readmissions, health-commodity supply chains and inventory. Seeking Business Analyst and data analyst roles.

### Skills

**Data and reporting:** SQL, Python (pandas, scikit-learn), R, Power BI, DAX, Power Query, Excel, Tableau, data modelling, KPI reporting

**Analysis methods:** statistical testing, regression and classification models, forecasting, cohort and subgroup analysis

**Business analysis:** requirements elicitation, stakeholder interviews, process mapping, acceptance criteria, business cases

### Projects

#### 30-Day Readmissions · Who should receive follow-up after discharge?

Independent project · Oct 2026

- Cleaned 101,766 hospital encounters (UCI public data) to 69,987 patients, removing repeat stays that would have overstated the evidence
- Built a logistic regression risk model in Python (test AUC 0.65) and showed that following up the highest-risk 20% reaches 37% of 30-day readmissions
- Found that the model flagged African American patients less often than white patients despite equal readmission rates (9.1%), and reported the gap with its limits
- Built a 7-page Power BI report (DAX, Power Query) and an interactive web dashboard covering capacity planning, subgroup checks and a hypothetical business case

[chigozie-nkwopara.netlify.app/readmissions-case-study](https://chigozie-nkwopara.netlify.app/readmissions-case-study)

#### USAID Delivery Performance · Where are late deliveries concentrated?

Independent project · 2026

- Analysed 10,324 health-commodity shipments to 43 countries using R, SQL, Power BI and Python
- Showed a 17.2% late-delivery rate for regional distribution centre routing against 5.3% for direct vendor delivery, and recommended a targeted route and customs review
- Found and fixed 2 data-integrity faults that distorted freight-cost averages by 30–40% and doubled row counts in Power Query
- Built a Random Forest classifier with training-only preprocessing (ROC-AUC 0.82, 90% recall on late shipments)

[chigozie-nkwopara.netlify.app/usaids-case-study](https://chigozie-nkwopara.netlify.app/usaids-case-study)

#### Stockroom Inventory Diagnostic · Which inventory issues deserve attention first?

Independent project, synthetic data · 2026

- Built a 5-page Power BI report with a star-schema model, DAX and Power Query across 3,204 SKUs
- Wrote Pearson correlation measures in DAX and tested a slotting hypothesis (near-zero link between popularity and pick time)

[chigozie-nkwopara.netlify.app/warehouse-case-study](https://chigozie-nkwopara.netlify.app/warehouse-case-study)

#### MSc coursework · Sales forecasting and customer segmentation

Northumbria University · 2023–2025

- Modelled historical sales demand in Python and R and presented forecasts in Tableau
- Modelled customer data in SQL and presented segment insights and recommendations in Power BI

## Professional Experience

### Hygiene Assistant · Country Style Foods, Newcastle upon Tyne

Jun 2025 – Present

- Maintain food-safety compliance and documentation standards in a high-volume production environment
- Record and report process data used in hygiene audits and reviews

### Retail Team Member · B&M Retail

Nov 2023 – Jan 2024

- Tracked inventory and flagged stock discrepancies
- Resolved customer queries and supported store operations

### Branch & Logistics Coordinator · P.N. Igweh Merchants, Nigeria

Jan 2020 – Oct 2023

- Reduced stock discrepancies by 15% relative to the pre-change baseline by introducing regular inventory reconciliation
- Increased orders processed per day by 10% through changes to the picking and dispatch workflow
- Improved the on-time delivery rate by 12% relative to the baseline and cut logistics costs by 8% through route and delivery analysis
- Gathered requirements from suppliers, managers and warehouse staff and built KPI reports for stock and delivery performance

### Career break

2017 – 2019

Travelled to Vietnam and volunteered teaching English to children before returning to Nigeria.

### Sales Executive · Nigerian Breweries Plc

Jan 2015 – Apr 2017

- Reviewed sales performance against targets to set territory and account priorities
- Supported sales forecasting and reported competitor pricing, distribution and product availability
- Managed customer and distributor relationships, linking sales plans to day-to-day delivery

### Senior Sales Officer · Consolidated Breweries Plc (Heineken)

Mar 2013 – Dec 2014

- Reviewed daily and monthly sales data to identify trends and growth opportunities
- Prepared sales reports on target achievement, volumes and competitor activity
- Supported forecasting using historical sales, seasonal demand and stock movement

## Education

### MSc Business Analytics, with Commendation · Northumbria University

Oct 2023 – Jun 2025

Data modelling, forecasting, business statistics and data visualisation.

## Certifications

- Microsoft Power BI Data Analyst (PL-300) · in progress
- Google Data Analytics Professional Certificate · in progress
